Dear Sirs,

This letter is regarding a corporation named Maranantha House Incorporated. I was recently contacted by a bill collector of theirs and when I asked why they were bothering me I was surprised to find out that they had contacted your office and that I was listed as a board member of this corporation.

I was never recruited or asked to be a board member and my sole involvement with this corporation was as a part time volunteer for a short time. After calling your office, it is my understanding that new board members for private non-profit corporations must be nominated or voted in by the previous board. Not only did this never occur to my knowledge but I was never approached in any way and find it appalling that someone can list people as members without some sort of verification. It is also my understanding that board members are responsible for the financial liabilities incurred by the corporation and may be held legally accountable for any debts incurred. I hope my understanding in this situation is accurate.

Additionally, I am concerned that there has undoubtedly not been an existing board for this corporation in some time.

Needless to say, I want my name removed from your listing as soon as possible and also would appreciate verification when this has been done. I am not clear as to what your offices role may be in investigating this matter but would appreciate notification that my concerns have been acknowledged.

I also plan to send a copy of this letter to the current Executive Director of this corporation, and ask that it be forwarded to any existing legitimate board members.

Sincerely,  
Mr. Kevin Peterson
