3544 E. 17TH STREET, IDAHO FALLS, IDAHO 83406

- JULIE A. BUTTARS**

- [illegible]

- Figure 1. The effect of the number of trials on the number of correct responses. The number of correct responses (Y-axis) is plotted against the number of trials (X-axis). The data points show a positive correlation, indicating that the number of correct responses increases as the number of trials increases. The regression line is shown as a solid line, and the confidence interval is shown as a shaded area.
